

DAIRY BLOCK

Emergency Coordinator Guide Book

Introduction

Emergency Coordinators & Building Captains are responsible for the safety of individuals and property in their assigned areas. As safety representatives, they will be the first point of contact for safety information and incident reporting for all building occupants. Each Emergency Coordinator & Building Captain will manage evacuations, check assigned areas, and coordinate emergency operations as necessary.

Purpose

Dairy Block Emergency Coordinators are dedicated to providing a safe environment for all staff, tenants, contractors and visitors. The Emergency Coordinator & Building Captain Program has been established to continue that commitment during an emergency. Emergency Coordinators & Building Captains will partner with personnel from Dairy Block Security and Property Management to assist staff, Tenants, contractors and visitors in the safe evacuation, Shelter-in-Place or Lock Down procedures in times of crisis. The Building & Floor Captain program is an important part of Dairy Block Emergency Response protocols.

As a participant in the Emergency Coordinator & Building Captain program, you provide a valuable service to the Dairy Block Community should an incident occur.

Program Structure

Dairy Block and each Tenant and or business owner will have an assigned number of Building Captains & Emergency Coordinators based on the size and location of the buildings. The Emergency Coordinator & Building Captain Coordinator will be the Building Safety Lieutenant, or his/her designee.

Building Captain – A Building Captain is in charge of a specific building or set of buildings within the facility. After helping with an evacuation, the Building Captain reports to an assigned area to accept reports from the Emergency Coordinators. The Building Captain then relays information to the Incident Commander. The Building Captain for the Dairy Block is Larry Whitted, Executive Director of Public Safety and Security. He can be reached at (303) 883-3996.

Emergency Coordinator – The Emergency Coordinator is in charge of a specific floor or several floors within the facility. The Emergency Coordinator must recognize the presence of an emergency, ensure the evacuation of his/her area, perform a sweep of the area to ensure all personnel have been evacuated, and report the status of the evacuation to their Building Captain.

Both Emergency Coordinators & Building Captains – In addition to the above, Emergency Coordinators & Building Captains will help educate and provide orientation to employees on emergency procedures for the building.

The ultimate responsibility for security and safety rests with each Tenant. The guidelines in this handbook apply to all Dairy Block tenants, their employees, vendors, contractors and guests, as dictated by and except where outlined in the Lease Agreement. Property Management reserves the right to modify these guidelines at any time. This document shall be distributed only to employees working at Dairy Block.

DUTIES: On-Going

Orient Yourself

- Know the entire layout of the building and the various evacuation routes. Have at least two escape routes out of the building.
- Be familiar with the location of occupants, including individuals with functional and access needs, in your building.
- Identify ideal locations for Shelter-In-Place and Lock-Down events.
- Know the locations of/and how to operate a fire extinguisher.
- Know all the other Emergency Coordinators and Building Captains in your building and in the adjacent buildings.
- Locate and know how to activate all fire alarms in your building.
- Know what hazards are in your building.
- Identify ways to avoid the hazards during evacuation, lock down or shelter-in-place events.
- Know where your building (or site's) Incident Command Post will be established.
- Know where emergency supplies are located in your building.

Orient Others

- Introduce yourself to individuals in your area and identify yourself as the Emergency Coordinator or Building Captain. Briefly explain your duties.
- Orient new employees on the emergency procedures for the building.

Training, Drills & Meetings

- Attend all training workshops and activities specifically designed for Emergency Coordinators or Building Captains.
- Participate in Dairy Block wide Emergency Drills or Exercises and take them seriously.
- Represent building/designated area at Emergency Coordinator or Building Captain Meetings. If a Emergency Coordinator or Building Captain from your area is unable to attend the meeting, ensure they receive the pertinent information from the meeting.

See Something? Say Something!

Report any suspected hazards, suspicious activities or any injuries to the following parties:

1. Dairy Block Security: (720) 576-8159
2. 911

The ultimate responsibility for security and safety rests with each Tenant. The guidelines in this handbook apply to all Dairy Block tenants, their employees, vendors, contractors and guests, as dictated by and except where outlined in the Lease Agreement. Property Management reserves the right to modify these guidelines at any time. This document shall be distributed only to employees working at Dairy Block.

Be Prepared – Both at Work and at Home

- Have a substitute identified to take your place if you are absent or indisposed during a drill, exercise or real event.
- Develop an emergency plan for your family. Know the plan for your children's schools.
- Build an emergency kit for your home, your car and your office.
- Identify resources within your area of responsibility which can be useful in an emergency (such as food stores, first-aid supplies, bottled water, camping equipment, etc.)
- Visualize your response to those emergencies that are most likely to happen in your building.

DUTIES: During an Emergency

Think, Communicate & Mobilize

- Determine emergency action (Evacuate, Lock-Down or Shelter-in-Place)
- Put on your emergency vest (if safe to do so), take your radio (if you have one) clipboard and backpack. Notify building/floor occupants of the emergency situation and get them to mobilize.

Evacuate Building

- Direct occupants in your area to evacuate, and continually call out evacuation route and meeting location.
- Sweep every room in your area, if safe to do so, to make sure that everyone has evacuated. Note any rooms that were locked that you could not check.

Help Special Needs Individuals

- Assist, or assign others to assist any individuals with access or functional needs (See section below for more specific information).
- Record hazards that might hinder First Responders if they need to enter the building after the building has been evacuated.

Emergency Coordinators Report to Building Captains

- Emergency Coordinators from each floor should report to the Building Captain at a pre-designated location outside the building. The Building Captain should prepare one report with the location of any trapped or injured people, any hazards found in the building, and a list of rooms that could not be checked.

The ultimate responsibility for security and safety rests with each Tenant. The guidelines in this handbook apply to all Dairy Block tenants, their employees, vendors, contractors and guests, as dictated by and except where outlined in the Lease Agreement. Property Management reserves the right to modify these guidelines at any time. This document shall be distributed only to employees working at Dairy Block.

Building Captains Report to the Command Post

- Report status of your building to the Command Post. This could be done via radio or if no radio is available, in person. It is important that the Incident Commander is aware of the status of your building, so he/she can direct emergency personnel to the needed areas.

Accountability Report

- As much as possible, account for all staff, contractor and visitors in your Assembly area. Check with Faculty members in your designated area and get their roll call outcomes. Update Command Post if needed.

Inform Occupants

- Let occupants from your area know that you will provide updated information and direction to them when it becomes available, but until that time, they need to stay in the area.
- Block Entrance to Building: Keep individuals from entering the building. This may require seeking the assistance of others.
- Provide updates as they become available to occupants in your area.

Signal “all clear” to occupants

- Only provide an “all clear” once it has come from an emergency responder (police officer, fire fighter or emergency services individual.)

Evacuation Procedure: Persons with Disabilities

General Procedures

During an evacuation, staff personnel are directed to assist persons with mobility disabilities away from the hazard area and towards an “area of rescue assistance” – a staging area for people to wait until emergency personnel arrive. An “area of rescue assistance” is an area adequately separated from the rest of the building by fire resistive construction, such as an enclosed stairwell; this area will receive attention first. A volunteer should remain with the person, if it is safe to do so. Make sure access to the stairs is not blocked.

If unable to go to the stairwell due to smoke, fire, or otherwise, occupants should stay in their room/office **and notify a co-worker who can pass the room number to the Emergency Coordinator or Building Captain.**

The ultimate responsibility for security and safety rests with each Tenant. The guidelines in this handbook apply to all Dairy Block tenants, their employees, vendors, contractors and guests, as dictated by and except where outlined in the Lease Agreement. Property Management reserves the right to modify these guidelines at any time. This document shall be distributed only to employees working at Dairy Block.

Mobility Impaired Emergency Rescue

If people are in immediate danger and cannot be moved to a safer area to wait for assistance, it may be necessary, only if you have had rescue training to evacuate them using an evacuation chair or a carry technique. Carrying options include using a two-person lock-arm position, or having the person sit in a sturdy chair - preferably with arms.

- Lifting a person may be harmful. Ask their preference about being carried forward or backward down a flight of stairs.
- Wheelchairs are not designed to handle the stress of lifting. Batteries may have to be removed.
- Before attempting an evacuation, volunteers and people being assisted should discuss how any lifting will be done and where they are going.
- Proper lifting techniques (e.g., bending the knees, keeping the back straight, holding the person close before lifting, and using leg muscles to lift) should be used to avoid injury to rescuers' backs.
- Ask permission of the evacuee if an evacuation chair or similar device is being considered as an aid in an evacuation. When using such devices, make sure the person is secured properly. Rest at landings if necessary.
- A straight back chair or evacuation chair requires at least two strong people who can control the chair (if the person agrees to this method.)
- People with mobility impairments, who are able to walk independently, may be able to negotiate stairs in an emergency with minor assistance. If danger is imminent, the person should wait until the heavy stair traffic has cleared before attempting the stairs. If there is no immediate danger (detectable smoke, fire, or unusual odor), the person with disability may choose to stay in the building, until emergency personnel arrive. If the person decides to use the stairs, someone should walk beside them to aid, if needed. Use a rolling office-type chair to quickly push injured persons to safety if needed.

Sample of Two-Person Carry

The ultimate responsibility for security and safety rests with each Tenant. The guidelines in this handbook apply to all Dairy Block tenants, their employees, vendors, contractors and guests, as dictated by and except where outlined in the Lease Agreement. Property Management reserves the right to modify these guidelines at any time. This document shall be distributed only to employees working at Dairy Block.

Visually Impaired Individuals

- Explain the nature of the emergency to the individual. Alarms or confusion may disorient a person, even when normally familiar with the area.
- Give verbal instructions and guide individuals to safety by having them hold onto your arm below the elbow.
- Verbally say where you are as you walk and describe any obstacles in the path.
- When you have reached safety, orient individuals as to where they are and ask them if they need further assistance before leaving.

Deaf and Hard of Hearing

Buildings at Dairy Block are equipped with fire alarm horn/strobes that sound the alarm, and flash strobe lights. The flashing strobe lights are intended to alert hearing impaired individuals. If the area does not have strobe lights, or the person with hearing disability does not see the lights, do the following:

- Get the individual's attention by touching their shoulders, flashing lights, or waving your arms.
- Write on a board or paper the nature of the emergency and evacuation route.
- Use visual cues and gestures to explain what is happening and what to do.

Active Shooter Situation

Lock Down your area of responsibility

- If possible, using outside door key or tool - if safe to do so.
- Notify people in area of responsibility to lock or barricade doors.
- Tell people to move away from windows and doors, spread out and remain quiet.
- Hide in a safe location.
- Remember Run, Hide, Fight (for active shooter events)
 1. **Run:** If you can escape, then do so.
 2. **Hide:** If you can't escape, then try to hide in a safe place. Barricade yourself in, using any objects available to delay the suspect from getting to you. Keep as low to the ground as possible, and build an internal barricade to keep gunfire away, if possible. Turn off lights and silence cell phones.
 3. **Fight:** Once barricaded— discuss with those in the room with you, how you plan to defend yourself. This can include having some individuals throw objects at the suspect while others tackle him/her.

The ultimate responsibility for security and safety rests with each Tenant. The guidelines in this handbook apply to all Dairy Block tenants, their employees, vendors, contractors and guests, as dictated by and except where outlined in the Lease Agreement. Property Management reserves the right to modify these guidelines at any time. This document shall be distributed only to employees working at Dairy Block.

Shelter in Place

- Notify people in area of responsibility of Shelter in Place. Encourage them to move to inner most rooms, with fewer windows and doors.
- Lock outside doors, if possible. If not, place sign on door (or nearby window telling individuals NOT to enter.
- DO NOT open the door for anyone – other than for uniformed police officers.

Shelter-in-Place Checklist

■ Secure Immediate Area:

- ✓ Lock and barricade doors.
- ✓ Identify anyone with a handgun.
- ✓ Turn off all lights.
- ✓ Close blinds or drapes.
- ✓ Silence cell phones.
- ✓ Turn off all electronics light and sound sources.
- ✓ Arm yourself with anything that can be used as a weapon.
 - Action of last resort.
- ✓ Remain calm, quite and out of sight.
- ✓ Take cover behind heavy objects or furniture that may repel bullets.
- ✓ Place signs on exterior windows noting occupants and injurious.

As a last resort, aggressively attempt to take the active shooter down. When the shooter is at close range and you cannot flee, your chance of survival is much greater if you try to incapacitate him/her.

The ultimate responsibility for security and safety rests with each Tenant. The guidelines in this handbook apply to all Dairy Block tenants, their employees, vendors, contractors and guests, as dictated by and except where outlined in the Lease Agreement. Property Management reserves the right to modify these guidelines at any time. This document shall be distributed only to employees working at Dairy Block.

Conclusion

Emergencies can come without warning at any time. Being prepared is the best way to handle these unexpected incidents and disasters. The information in the Dairy Block Emergency Coordinator and Building Captains guide book should work in conjunction with the Dairy Block Emergency Operations Plan and is intended to cover most emergencies but it cannot anticipate every type of situation for every disaster scenario. Basic training for emergency response allows the Dairy Block staff to react to disasters or emergencies with initial action. Use common sense when instructions are not given, or direction is not available. Think before you act, then act swiftly to minimize your exposure to danger.

Dairy Block Emergency Coordinator and Building Captain guide has been designed to assist the Dairy Block Community, Tenant staff, Contractor staff and visitors in the protection of life and property in the event of an active shooter, fire, explosion, or other emergency on the Block.

The Dairy Block Emergency Coordinator and Building Captain guide book provides a basic contingency plan for Dairy Block Administrators and supervisors in case of onsite emergencies. While this guide does not cover every conceivable situation, it does supply the basic guidelines necessary to cope with most emergencies.

APPENDIX A: Assembly Area Map

Evacuation assembly areas are divided by address. The Emergency Incident Command Center will stage on the southeast corner of 18th & Wazee.

Dairy Block Evacuation Assembly Area Map

Tenants and guests should safely cross the street and assemble in the designated assembly areas to await further instruction.

Occupants exiting on Wazee Street should assemble in the plaza at Union Station.

Occupants exiting on Blake Street should assemble in the parking lot on the North corner of 18th and Market Street.

The ultimate responsibility for security and safety rests with each Tenant. The guidelines in this handbook apply to all Dairy Block tenants, their employees, vendors, contractors and guests, as dictated by and except where outlined in the Lease Agreement.
